Events

20 pages.

The full property reference lives on the [Calendar](<https://www.agoramos.com/calendar/portal>) page. Two rules matter most:

- ``status: private`` keeps an entry out of the public calendar while leaving it visible in your editor.
- ``category`` sets the colour stripe. Use ``running``, ``hiking``, ``food``, ``growing``, or ``observance``.

Leisure entries

- [Morning Trail Run](<https://www.agoramos.com/events/2026-08-12-morning-trail-run>) – running
- [Market Cook-Along](<https://www.agoramos.com/events/2026-08-15-market-cook-along>) – food
- [Ridge Day Hike](<https://www.agoramos.com/events/2026-08-22-ridge-day-hike>) – hiking
- [Growing Week](<https://www.agoramos.com/events/2026-08-24-growing-week>) – growing, multi-day
- [Autumn Harvest Table](<https://www.agoramos.com/events/2026-09-05-autumn-harvest-table>) – food
- [Leaf Season Ridge Walk](<https://www.agoramos.com/events/2026-10-10-leaf-season-ridge-walk>) – hiking

Several of these carry a placeholder location and need real details before they read as public listings.

Observances

Drawn from [Yearly Calendar 2026](<https://www.agoramos.com/calendar/yearly-calendar-2026>):

- [International Youth Day](<https://www.agoramos.com/events/2026-08-12-international-youth-day>)
- [World Tourism Day](<https://www.agoramos.com/events/2026-09-27-world-tourism-day>)
- [World Food Day](<https://www.agoramos.com/events/2026-10-16-world-food-day>)

Older pages in this folder

The film and organisation pages here predate the calendar convention. Any of them that already start with a date – such as the [CINEPOSIUM](<https://www.agoramos.com/events/cineposium>) pages – are picked up by the calendar automatically. The rest join once a ``date:`` property is added.

Every dated entry lives here. A page in this folder with a ``date:`` property appears automatically on the [Calendar](<https://www.agoramos.com/calendar/portal>) month grid – there is

no separate list to keep in sync.

Adding an event

Copy [Event Template](<https://www.agoramos.com/templates/event-template>), or create a page named `YYYY-MM-DD-short-title.md` and fill in the front matter:

```
```yaml
```

```
Calender
```

```
Hosted
```

```
Classes
```

```
Mixers
```

```

```

```
Merged Segment (.review/organized/E/Events.md)
```

```
[Indie Gathering](https://www.agoramos.com/indie-gathering)
```

```
Pages
```

```
