Jerky

Meat dried, and usually salted and smoked. Commercially dried keeps a year; homemade gets sixty days, and the gap is a warning about how thoroughly it has to be dried.

How long it keeps

Unopened, this keeps **12 months** — which is what puts it on [the long shelf](#).

As sold	Unopened, in the cupboard	Once opened
commercially dried	12 months	2–3 months — refrigerated
homemade	1–2 months	—

Counted from the day you bought it and the date on the package. Figures are the **USDA FSIS FoodKeeper** table's, for unopened storage at room temperature; FoodKeeper counts a month as 30 days.

The table was not pulled from USDA — fsis.usda.gov answers 403 to non-browser clients from this machine — so it came from a mirror of the data.gov dataset and its vintage is unverified. Treat a single figure as indicative, not as a use-by date.
