Tomato Sauce

Home-canned tomato sauce. It keeps a year when the acid is right — which for modern low-acid tomatoes means added lemon juice or citric acid, every time.

How long it keeps

Unopened, this keeps **12 months** — which is what puts it on [the long shelf](#).

As sold	Unopened, in the cupboard	Once opened
homemade, canned	9–12 months	—

Counted from the date on the package. Figures are the **USDA FSIS FoodKeeper** table's, for unopened storage at room temperature; FoodKeeper counts a month as 30 days.

The table was not pulled from USDA — fsis.usda.gov answers 403 to non-browser clients from this machine — so it came from a mirror of the data.gov dataset and its vintage is unverified. Treat a single figure as indicative, not as a use-by date.
