topics

mission statement

we should try to as society and maybe even the USDA, try to adopt more "civil" popularity for American cover crops.

grains

grain

price per 50lb

rye	30
buckwheat	50
oats	15
Wheat	15
Amaranth	70
millet	30
Barley	20
Sorghum	15
winter rye	

- Triticale is a hybrid grain resulting from the crossbreeding of wheat and rye.
- It inherits characteristics from both parent grains, making it a versatile cover crop.
- Triticale is often chosen for its ability to scavenge nutrients, prevent erosion, and provide ground cover.¹

[bean and legumes]

seeds

sunflowers hemp mustard

root vegetables

daikon radish

- our variety focuses on sugar size disease resistance, land racing success and rattail size.

turnip

misc.

Okra

1. rapeseed
